Hi Mr Schwander

The Liberty license was actually superseded by the "Ultimate Liberty". This license is very permissive and allows modification and redistribution.

To be on the safe side however, I would recommend to:
-        Clearly identify the portions you wrote inside the source files
-        Add an header with your own terms under which you distribute your modifications. You are welcome if you choose also Ultimate Liberty terms

You can then distribute the way you want. If you're willing to explain your work on ST community and to share location where to grab the files, welcome also !

Rgds
Laurent Desseignes
